Subject: Dimock well data - request for additional time to review

Hello, Mike, Vickie and Karen

At EPA R3's and the residents' request, ATSDR R3 has preliminarily reviewed the water sampling data from PADEP and Cabot for approximately 20 private wells in Dimock, PA. Ex. 5 - Deliberative Ex. 5 - Deliberative
Ex. 5 - Deliberative A few wells in the site area do not appear to ever have been sampled. We have been informed that some residents have refused to accept treatment systems, citing the

post treatment data showing ineffective treatment. It would be beneficial to have more time to review this information in more detail to further consider the public health implications. We will prioritize evaluation of the well data based on the preliminary screening results.
